

**Revised Total Coliform Rule (RTCR) Failure to Report Monitoring Events to the State that are Not Related to *E. coli*-positive Sample Results - Template 3-5**

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**

**Reporting Requirement(s) Not Met for ROMAN FOREST PUD 4**

**PWS 1700237**

We are required to report the results of monitoring of your drinking water for specific contaminants on a regular basis by MAY & JUNE 2021. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During MAY & JUNE 2021, we did not report the results of monitoring for total coliform.

Our system failed to notify the state drinking water program as required by MAY & JUNE 2021. Although public health was not impacted, as our customers, you have a right to know what happened and what we did to correct the situation.

**What should I do?**

There is nothing you need to do at this time. You do not need to boil your water or take other actions.

**What is being done?** In order to return to compliance our system was required to collect a complete round of distribution samples within the correct compliance period and those were collected on 07/27/2021.

For more information, please contact:

Water System Official: [Brenda Landin](#)

Area code + phone number: [\(281\) 350-0895](#)

Date distributed: August 31, 2021

*\*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail. \**

This notice is being sent to you by **ROMAN FOREST PUD 4**. State Water System ID# 1700237.
